Two-day course

Contemporary treatment  
of the atrophic posterior maxilla:  
maxillary sinus surgery and  
alternative treatments

### Abstract

Sinus elevation surgery has become an indispensable part of the practice of implant surgery, periodontics, and oral surgery.

Procedures have evolved during the last 30 years to a point where sinus grafting surgery is considered the most successful augmentation procedure performed today and the survival rate of implants placed in grafted sinus is comparable to implants placed in the non-grafted posterior maxilla.

The sinus elevation procedure is still evolving today due to the development of new surgical techniques and new biomimetic technologies.

The two-day course will present sinus elevation surgery via lateral and crestal approach and possible alternatives to sinus surgery.

Multiple video presentations and live surgeries will enable participants to realistically experience sinus elevation surgery.

The course will present both evidence-based and new state-of-the-art techniques.

### Learning objectives

At the completion of the program, the participant will be able to:

- Understand surgical anatomy to prevent complications and achieve optimal results
- Understand the rationale for correct preoperative planning
- Understand the selection of grafting materials and soft tissue substitutes
- Conduct step-by-step surgical techniques
- Evaluate alternatives in treatments
- Management post-op complications

### **1<sup>st</sup> day - date TBD**

#### MORNING SESSION

##### *Review of the literature*

##### *Clinical indications for:*

- Different types of graft materials
- Different membranes over the antrotomy

##### *Presurgical patient diagnosis:*

- Criteria for patient evaluation
- Criteria for site-specific evaluation
- Sinus physiology
- Contraindications from the otorinolaryngological point of view

#### AFTERNOON SESSION

##### *Surgical procedures step-by-step for:*

- The lateral approach: theoretical part with video session
- The crestal approach: theoretical part with video session

### **2nd day - date TBD**

#### MORNING SESSION

##### *One live surgery:*

- Step-by-step lateral approach for maxillary sinus elevation
- Video of all surgical procedures

##### *Debriefing of the surgical sessios*

#### AFTERNOON SESSION

##### *Alternatives in treatment.*

##### *Indications and contraindications for:*

- Short implants
- Tilted implants
- Transinusal implants
- Pre-post sinus implants
- Zygomatic implants

##### *Diagnosis and management of maxillary sinus complications*

##### *Questions time and end of the course*
